

# Industry Guide For Infrastructure

# Enabling Efficiency & Connectivity

Oak Engage supports your workforce through next level connectivity, communication and collaboration.

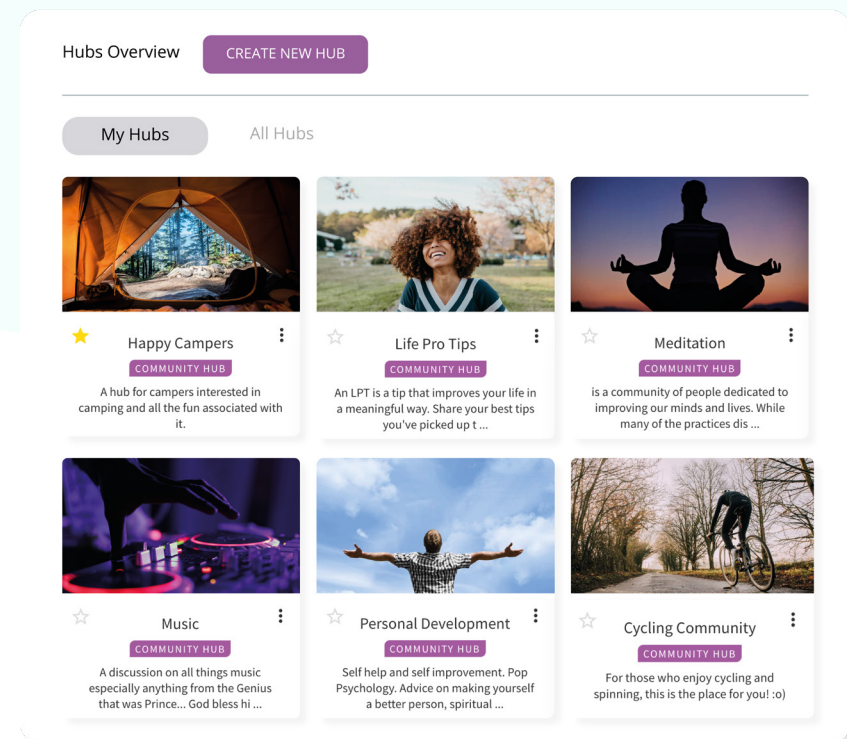

With adaptive intelligence, communications are precise, relevant and timely - essential to maintaining productivity within any organisation.

## Government Services

### Modernise Communications, Securely

Tired of slow, restricted communication? Oak Engage's instant messaging and community hubs are modern comms tools that improve collaboration and communication. Information is easily sourceable too, with content management and federated search.

Connectivity does not compromise security. You can set restrictions for downloading/accessing the app to specific users or devices.

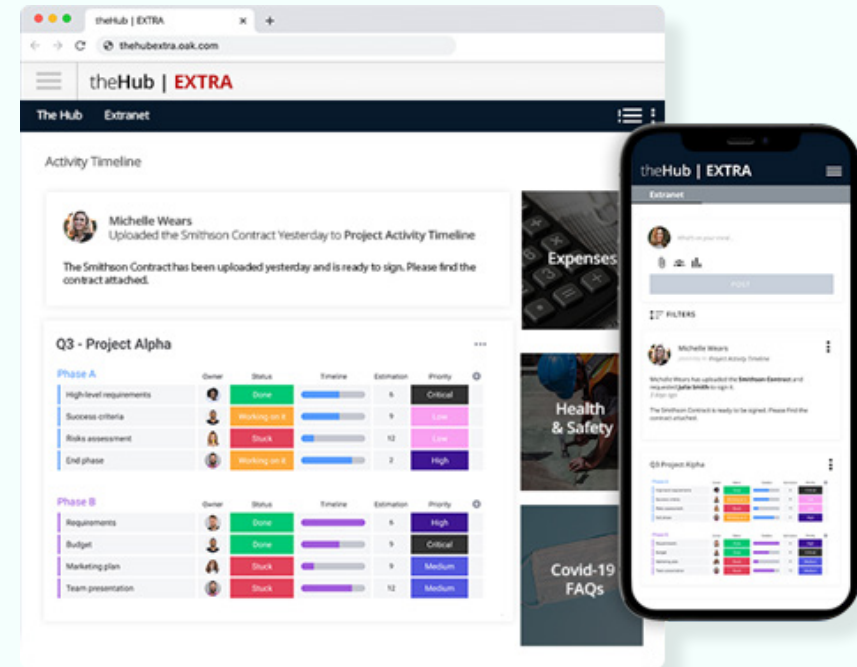

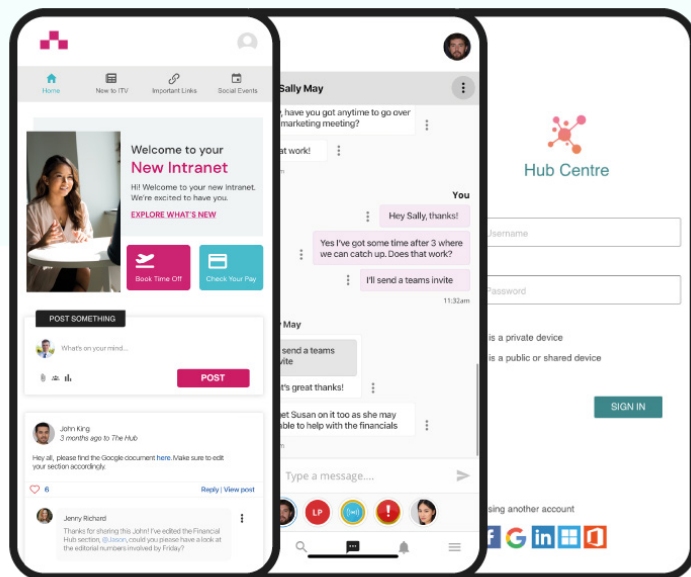

## Telecommunications

### Better Connectivity for Telecoms

Communication should be inherent in telecoms.

With Oak Engage you can champion communication in the workforce. Through Hubs and other streams of communication where employees can consume information, share knowledge and keep updated.

Keeping external partners in the loop, Oak Engage has a dedicated extranet feature for project teams outside of your business.

## Transport

### Connecting a Mobile Workforce

The transportation workforce is vast. Engineers, drivers, customer service and much more. But, they all have one thing in common...a lack of desktop access.

Oak Engage's mobile app connects the entire workforce to the organisation and to each other. Deskless workers can access important systems and information at any time of day, receiving urgent comms through Push Notifications.

# Intranet Features for Infrastructure

## Mobile App

Provide an immersive experience and give employees remote access to their company intranet.

## People Directory

Make it easy for your employees to extract important information about colleagues.

## Social Intranet

Give your employees endless ways to communicate via integrated social features.

## Hubs & Communities

Create dedicated areas for your employees to come together and collaborate.

## Advanced Search

Provide your employees with instant access to anything they need.

## Content Management

Allow your workforce to access content and complete tasks anywhere, anytime.

“

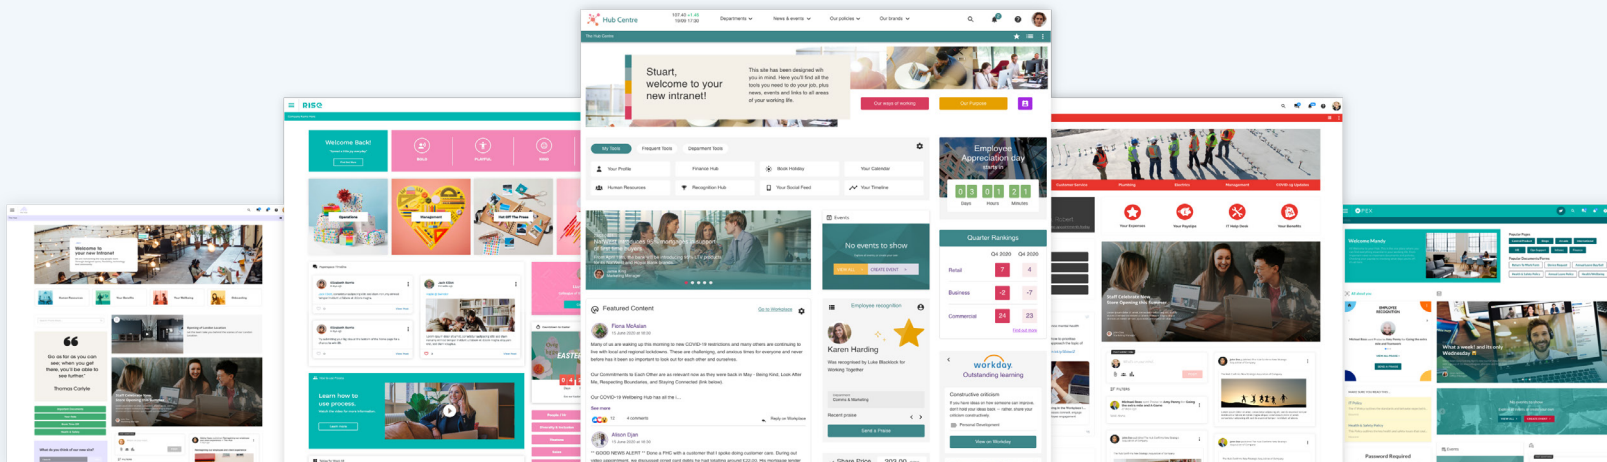

The site has been really well received by our colleagues here at HSS Hire, our people are already appreciating the design of the platform. The solution is a great match with our colleague engagement strategy as well as our security and governance agenda. We've had such positive feedback around how much easier and more intuitive it is to use. Bottom line, secure and great to use.”

---

Kevin Price, Group IT Director, HSS Hire
